

China BAK to Present at the 25th World Electric Vehicle Symposium and Exposition in Shenzhen

SHENZHEN, China, Oct. 28 /PRNewswire-Asia-FirstCall/ -- China BAK Battery, Inc. ("China BAK", the "Company", or "we") (Nasdaq: CBAK), a leading global manufacturer of lithium-based battery cells, today announced that management will present at the 25th World Electric Vehicle Symposium and Exposition (EVS) series scheduled for November 5-9, 2010 in Shenzhen, China.

China BAK's presentation details at EVS are as follows:

Event: The World Electric Vehicle Symposium and Exposition
Date: Monday, November 8, 2010
Time: 10:45 a.m. Beijing time
Presenter: Mr. Huanyu Mao, General Manager of BAK International (Tianjin) Limited
Location: Shenzhen Convention & Exhibition Center, China

"EVS attracts academic, government and industry leaders from all over the world seeking to explore and understand the technologies, developments, and trends in electric transportation technologies," commented Mr. Jun Zou, China BAK's chief financial officer. "Our continued commitment to research and development has enabled us to align our design and production with industry trends for energy efficient and green transportation technologies. At the exposition, we will drive our customer's electric vehicles powered by our high-power batteries. We believe our presence at this high profile exposition will potentially broaden the market opportunities for our electric vehicle high-power batteries."

About The World Electric Vehicle Symposium and Exposition

The World Electric Vehicle Symposium and Exposition (EVS) series, organized by World Electric Vehicle Association (WEVA), is recognized as the premier event for academic, government and industry professionals involved in electric drive technologies. The EVS series began in 1969 as an academic forum for global networking and the exchange of technical information. Today, the EVS series is recognized as the global electric transportation industry's premier and largest forum, showcasing all forms of technologies in the market place and on the drawing boards--from low speed battery electric vehicles to fuel cell electric buses.
