

China BAK to Attend 2011 International New Energy Application and Battery Exhibition

SHENZHEN, China, Oct. 19, 2011 /PRNewswire-Asia/ -- China BAK Battery, Inc. ("China BAK" or the "Company") (NASDAQ: CBAK), a leading global manufacturer of lithium-based battery cells, today announced that the Company will attend the 2011 International New Energy Application and Battery Exhibition hosted by China Battery Industry Association to be held in Beijing from October 30 to November 1, 2011.

China BAK will exhibit its various cell types, including 18650, 26650, 26700 and 36800 cells, and various modules for use in Electric Vehicles (EVs) and e-bikes. The Company's new single battery was developed as a result of the Company's research efforts to address the challenging technical problems associated with the internal high temperature conditions of a battery, will also be displayed at the exhibition. The Company's single battery module, with a capacity of 100Ah, consists of a number of 18650 cells, and is based on module standardization, adopting the mature 18650 cell technology and American modular techniques. The Company recently announced the launch of this new product at its 10th anniversary celebration in September 2011. In addition, China BAK will have on display three e-bikes and four power tools powered by the Company's lithium batteries to enhance attendees' experience and provide a better understanding of the Company's products.

"We are looking forward to the opportunity to showcase our products at one of the largest annual new energy exhibitions, which represents the level and orientation of China's new energy industry," commented Mr. Xiangqian Li, CEO of China BAK. "We believe the exhibition will provide us with an attractive platform to present our product portfolio and R&D achievements. We expect that a greater number of auto manufacturers and e-bike manufacturers will be able to better understand our products, enabling us to expand our market share and strengthen our market recognition."

About the International New Energy Application and Battery Exhibition

The 2011 International New Energy Application and Battery Exhibition is hosted by China Battery Industry Association and will be held in the China International Exhibition Center from October 30 to November 1. Centered on the concept "prospected by policy, led by technology, expanded by market and nurtured by financing," the exhibition focuses on exhibition of battery products and components, new energy application and industrial base achievement, and new energy technology, information and investment service. The exhibition typically attracts about 200 well-known academic scholars, high-level government leaders and business leaders in new energy enterprises, over 500 national and international enterprises and institutions and over 10,000 other visitors.
